New iKeychain™ provides The Ultimate Protection for iPod® *shuffle*

Santa Clara, CA - August 1, 2005 A-1 Quality Products, Inc. introduces the iKeychain(tm), a strong, lightweight machined aluminum case for the iPod(R) *shuffle*. iKeychain is available in various colors and is held together with tiny magnets making it easy to use but does not affect the flash memory.

With openings for the controls, the iKeychain also accommodates a variety of headphone jacks and has a keychain ring. This unique feature ensures that when you are on the go, your favorite tunes and or computer files are at your fingertips. With a carabineer hook, the iKeychain securely attaches to a backpack, bike, purse strap, or belt. It can also be worn around your neck with a choice of colorful lanyards.

The unsurpassed strength is an excellent way to protect the iPod *shuffle* while skateboarding, snow skiing, snowboarding, rollerblading or participating in any other extreme sport. Our strength test showed that this case is so strong that it survived being run over by a truck.

iKeychain is now available at <http://www.A1QP.com> with a retail price of \$29.95

iKeychain™

iKeychain is designed and manufactured in Santa Clara, California. Founder Joe Davis, has been in the precision machining business for the last 20 years. Mr. Davis has machined parts for aerospace, biotech and technology companies in the Silicon Valley and is known in the industry as a perfectionist in his trade. Upon purchasing the iPod® *shuffle*, Davis realized the need for a protective cover to withstand the most extreme conditions and the iKeychain was created.

iPod is a registered trademark of Apple Computer, Inc.
