A-1 Quality Products Deliver the Ultimate Protective Case for iPod nano

SANTA CLARA, Calif., December 1, 2005 - A-1 Quality Products, Inc. is proud to announce a new addition to the iKeychain™ series of protective iPod® covers. The toughest iPod cases available, the new machined nano cases – available in various colors and manufactured in the USA – are ready for use, out of the box. The refined case weighs only 38 grams and includes two notches to allow for easy opening and help eliminate having to press on the nano screen or click wheel to open the case. Powerful magnets are incorporated for easy access to the enclosed iPod nano and do not interfere with the flash memory. The access holes in the case allow for easy operation of viewing and listening features, and will accommodate most headset jacks.

iKeychain™ for the nano is available at www.A1QP.com starting at \$39.95.

About iKeychain™

The concept and design behind the iKeychain is very simple. Inventor Joe Davis found that his active lifestyle was putting his iPod shuffle at risk. While hiking, bicycling and participating in other extreme sports he wanted his music with him but determined that other case designs did not afford him the protection he wanted. Using his 20 years of machining experience and the knowledge from designing parts for aerospace, biotech and other technology companies in the Silicon Valley, he found that the lightweight qualities, matched with the strength characteristics of aluminum, made for an excellent protective case.

Availability and Pricing

Cases are available now online at www.A1QP.com. The new "space tape" finish or your choice of anodized colors including maroon, blue, clear and black, make this a very fashionable product. Specialty covers, combinations of black anodized back and polished chrome front, reversed with black front and chrome back or one of a kind, anodized artwork design are available at an additional cost. All covers include a split key ring to easily hang your iPod from a lanyard, carabiner hook or use as a keychain. Personalized engraving, including corporate logos, is available.

iKeychain is pending trademark of A-1 Quality Products, Inc. in U.S. and other countries. iPod is a trademark of Apple Computer, Inc., registered in the U.S. and other countries.
